Solidago shortii at Old Bison Trace, Fleming and Robertson counties. This plant is on the federal list of threatened and endangered species.

MISSION

The Kentucky Heritage Land Conservation Fund (KHLCF) was established by the 1994 Kentucky Legislature and is administered by a 12-member board. The board's mission is to award funding for the purchase and preservation of selected natural areas in the Commonwealth; to protect rare and endangered species and migratory birds; to save threatened areas of natural importance; and to provide natural areas for public use, outdoor recreation and education.

The fund is supported by the state portion of the unmined minerals tax, environmental fines, the \$10 additional fee to purchase a Kentucky nature license plate and interest on the fund's assets.

The board can award grants to acquire and protect areas of natural significance to local governments, state colleges and universities and specified state agencies.

ELIGIBILITY CRITERIA

Applicants for KHLCF grants are required to provide documentation that explains how a proposed acquisition will meet one or more of these priorities:

- 1. Natural areas that possess unique features such as a habitat for rare and endangered species;
- 2. Areas important to migratory birds;
- 3. Areas that perform important natural functions that are subject to alteration or loss; and
- 4. Areas to be preserved in their natural state for public use, outdoor recreation and education.

Applications must also include: (1) an enumeration of costs, (2) a budget that indicates how at least 10 percent of acquisition costs will be spent for management and (3) a preliminary resource management plan for the project. During fiscal year 2004, the Kentucky Heritage Land Conservation Fund Board held four regularly scheduled quarterly meetings to consider applications for funding.

SUMMARY OF ACTIVITIES

This has been another eventful year for the Kentucky Heritage Land Conservation Fund Board (KHLCFB). The board reviewed numerous applications and approved 13 projects in 14 counties in fiscal 2004. Since the first awards were made in October 1995, the board has approved 128 projects in 60 counties.

This year, local government projects were approved in Hart and Jessamine counties; state agency projects were approved in Adair, Allen, Fleming, Franklin, Fulton, Hart, Hickman, Laurel, Lincoln, McCreary, Robertson, Taylor and Wolfe counties.

Nearly 2,800 acres of natural areas and wildlife habitat were purchased or protected with Heritage Land funds during fiscal 2004. Purchases were made on 10 projects, including the Upper Green River Biological Preserve in Hart County and Griffith Woods in Harrison County. The Hart County acquisition will help protect significant freshwater mussel habitat and the tract in Harrison County is considered to be the best remaining remnant of the original savanna-woodland that characterized the presettlement vegetation of the Inner Bluegrass. A complete list of properties purchased or protected in FY 2004 is at the end of this summary.

Almost 23,000 acres involving 78 projects have been purchased since October 1995. Costs of these projects (acquisition, administration and management) exceed \$25 million. Sizes of projects are as follows:

> 1,000 acres	5 projects
500 - 999 acres	5 projects
100 - 499 acres	36 projects
10 - 99 acres	27 projects
< 10 acres	5 projects

The board this year held two of its quarterly meetings outside Frankfort so members could visit purchased properties. In October 2003, following a site visit to Griffith Woods in Harrison County, the board met at the Kentucky Horse Park. In April 2004, the board visited the Highview Hill and Ohio County Park Addition in Ohio County.

Popularity of the viceroy butterfly nature license plate has surpassed expectations. Sales of all three nature license plates exceeded \$1 million for the year.

Nevertheless, the board remains concerned with the continuing and increasing problem of money. More and more significant projects either cannot be funded or must be funded on a partial basis over an extended period of time, which makes the program dependent on the willingness of property owners to be patient for several years while funds slowly accumulate. A project requiring immediate purchase is subject to being sold for development and lost forever from Kentucky's natural landscape.

Legacy State Forest, Adair and Taylor counties

Fiscal Year 2004 Purchases

PROJECT	AGENCY	COUNTY	ACRES
Boatwright WMA Addition	Fish and Wildlife Resources	Ballard	443
White Oak Creek Addition #3	KSNPC	Garrard	5

		Total Acreage	2,757

APPROVED PROJECTS

(July 1, 2003 to June 30, 2004)

Competitive Grants

JESSAMINE COUNTY FISCAL COURT

Jessamine Creek Preservation, Jessamine County, 226 acres

This project includes acquisition of three parcels along Jessamine Creek. Overstreet Cave, possibly the most significant gray bat cave in central Kentucky, is on one of these parcels. Several rare and threatened plant species are also found on these tracts. There is significant development pressure in the immediate vicinity and acquisition will ensure protection of the cave and foraging areas used by the bats, as well as biologically sensitive habitats.

WESTERN KENTUCKY UNIVERSITY

East Mammoth Cave Educational Reserve, Hart County, 130 acres

This property contains the Weller entrance to Mammoth Cave, one of six known private entrances to Mammoth Cave. It is the only entrance currently not monitored and the entire cave system could be endangered from this unprotected entrance. The property is close to the Upper Green River Biological Preserve, also purchased with Kentucky Heritage Land funds. Purchase of the tract will also provide additional habitat for migratory birds.

State Agency Grants

KENTUCKY DEPARTMENT OF FISH AND WILDLIFE RESOURCES

Legacy State Forest, Adair and Taylor Counties, 3,000 acres

This tract is the largest remaining block of privately owned forest in the south central region of Kentucky. It is bordered on three sides by the 3,200-acre Green River Wildlife Management Area. Acquisition of this land will create 25,000 acres of publicly owned contiguous property. This property is important to migratory birds because it is not fragmented. The forest is considered second-growth and provides good habitat for wildlife. Recreational uses of the property will include hunting and hiking.

Obion Creek Addition, Fulton and Hickman Counties, 1,078 acres

The primary goals of acquisition of these two tracts is to link two existing wildlife management areas, increase the number of perpetually protected wetland acres in the region, provide additional resting and feeding areas for migratory birds and expand outdoor recreational opportunities for Kentucky sportsmen and women.

DIVISION OF **F**ORESTRY

Legacy State Forest, Adair and Taylor Counties, 3,000 acres

See description under Kentucky Department of Fish and Wildlife Resources

KENTUCKY STATE NATURE PRESERVES COMMISSION (KSNPC)

Carpenter Cave, Allen County, 14 acres

The current property owners have donated a conservation easement to the Kentucky State Nature Preserves Commission. The relatively undisturbed cave on this property is a significant maternity cave for the federally endangered gray bat. Based on population counts at the cave, the population appears to be increasing in size and importance.

Feindel Tract, Franklin County, 15 acres

The owner of this tract will donate a conservation easement on approximately 15 acres containing Braun's rockcress and associated habitat. Braun's rockcress is one of Kentucky's rarest plants and has been added as an endangered species to the Federal List of Endangered and Threatened Wildlife and Plants. This tract supports a high quality occurrence of the plant and will offer permanent protection to the population.

Lincoln County Barrens State Nature Preserve, Lincoln County, 504 acres

This site is a large native grassland remnant that is unique not only for the Outer Bluegrass Region but for the state. Limestone barrens, gravelly glades and open grassland habitat are interspersed with subxeric forests on several broad ridge tops and side slopes above a tributary of the Dix River. Several rare species are found on the property.

Old Bison Trace, Fleming and Robertson Counties, 128 acres

This property will be acquired, dedicated and managed as a state nature preserve to protect the endangered Short's goldenrod. The site consists mainly of successional oak-hickory forest cover dominated by shingle oak and red cedar. A healthy population of Short's goldenrod occurs on the tract, along the bison trace and in the more open areas of the nearby forest.

DEPARTMENT OF PARKS

Legacy State Forest, Adair and Taylor Counties, 3,000 acres

See description under Kentucky Department of Fish and Wildlife Resources

DIVISION OF WATER - WILD RIVERS PROGRAM

Angel Tract, McCreary County, 39 acres

This is one of a few privately owned tracts within the Cumberland Wild River corridor. It is bordered on two sides by lands managed by the U.S. Forest Service and on one side by a portion of Cumberland Falls State Resort Park.

Goebel Tract, Hart County, 127acres

This tract is bordered on two sides by the Green River, with over one mile of the river comprising the northern and western property boundaries. Several rare or endangered mussel species are found at the downstream edge of the property. This property is desirable for development, and purchase of the tract will help protect the water quality, plants and wildlife of the Green River.

Bruce Smith Tract, Wolfe County

Joe Jackson Rock Creek Tract, McCreary County, 105 acres

This tract is an example of a relatively high-quality oak-hickory and cove hardwood woodland, with some storm and insect-damaged shortleaf pine on the eastern side of the property. Acquisition and management of this tract as a natural area will protect this area from development, and help protect the water quality of the unnamed tributary of Rock Creek, which drains the watershed.

Reynolds Tract, Laurel County, 325 acres

Sinking Creek, which the Divison of Water has classified as an "Outstanding State Resource Water" forms 2.8 miles of the boundary of this property. The creek has endangered mussels. In addition, the tract is nearly surrounded by the Daniel Boone National Forest.

Bruce Smith Tract, Wolfe County, 200 acres

This tract is one of the few privately owned properties that border the Red River within the Wild River segment. It has over two miles of river frontage. Accessibility to the Red River makes it important for public use, passive outdoor recreation and education.

Environmental Education

Kentucky Environmental Education Council (Report provided by Jane Wilson Eller)

Since its inception over 40 years ago, much environmental education has been episodic, with no long-term plan for improving environmental literacy in Kentucky or the nation. It would be similar to teaching history only occasionally, such as on Lincoln's birthday, using teachers with no particular history background. Kentucky has taken a different tack. An environmental education master plan was published in 1999. We posed a series of "what if" and "how" questions, then devised strategies for improving the quality and delivery of environmental education statewide. Below are some of those questions and strategies:

What if all teachers in Kentucky received in-depth training to better prepare them to teach about the environment?

Strategies: <u>The Environmental Education Endorsement</u> now approved and passed into law. This will make it possible for teachers to specialize in environmental education as they do their graduate work. Several universities will begin offering the endorsement in the next year or so.

Improved preparation for ALL preservice teachers in Kentucky is now required under guidelines from the Education Professional Standards Board. This will be reinforced by the new EE standards from the National Council for the Accreditation of Teacher Education. The NCATE partnership is also a direct outgrowth of the Kentucky Master Plan for EE.

What if we design and offer an in-depth professional development program for non formal environmental educators which will prepare them to provide high quality EE to citizens of all ages? Strategy: Kentucky now offers a voluntary certification program for all nonformal environmental educators. It is based on the national standards for environmental educators, contains numerous assessments and is one of only three such programs nationwide. Our first class of 40 is currently matriculating through this rigorous program.

What if we had a system that could deliver high-quality environmental education at the college level, coordinate services statewide and evaluate current programs?

Strategy: <u>Create the Kentucky University Partnership for Environmental Education (KUPEE</u>). This is now a functioning network of the eight state universities. It is partially supported by state funds, though expected support from HB 174 funds has been limited.

How do we know if our citizens are prepared to deal with environmental issues?

Strategy: In 1999, working with the UK Survey Research Center, we conducted a survey of environmental knowledge, attitudes and reported behaviors. The results of this survey were published in the first EE Master Plan. In September 2004, we will conduct the survey again and compare responses to see if there have been gains or losses. Though surveys of this type are only snapshots of actual environmental literacy, they can help direct work to certain areas where knowledge or attitudes indicate a special need for better education.

How will we prepare Kentucky's future leaders to deal with environmental issues, especially with respect to planned growth?

Strategy: Sponsor a Youth Environmental Summit on Planned Growth and the Environment. Allow students to conduct their own research on the topic and present that research at a statewide forum. We have now held two youth summits and another is planned for March. We have been pleased by the depth at which students are able to analyze growth issues and how these issues will affect them and their communities.

KEEC has numerous other initiatives as well. The message we want to convey is that we are not conducting environmental education in the usual way. Instead, we are looking critically at exactly what we believe we need to do to improve environmental literacy and strategically designing programs that meet those needs.

Kentucky Heritage Land Conservation Fund Board Members

The 12-member board was established by the Kentucky General Assembly in 1994. Five members are appointed from state government agencies - one each from the Department for Natural Resources, the Department of Fish and Wildlife Resources, the Department of Parks, the Kentucky State Nature Preserves Commission and the Environmental Education Council. Seven members of the board are private citizens selected by the governor from nominations by conservation groups, the Kentucky Academy of Science, agricultural interests and natural resources industries. Dr. William H. Martin, Eastern Kentucky University, has been appointed by the governor to serve as chair of the board.

Citizen members receive no pay for attending quarterly board meetings and serving on committees of the board. Committees review applications and visit project sites, review and monitor site stewardship and provide advice and recommendations on issues coming before the board. Board members for the 2003-04 fiscal year were:

Hugh N. Archer Susan Bush Commissioner, Department for Natural Resources 663 Teton Trail Frankfort, KY 40601 (502)564-2184 Ex Officio

Don Dott Director, Kentucky State Nature Preserves Commission 801 Schenkel Lane Frankfort, KY 40601 (502)573-2886 Ex Officio
